

# iOS SDK Development for Telecommunications Company

## PROJECT DETAILS

 Mobile App Development

 Apr. 2024 - Apr. 2024

 Confidential

“

*"The iOS developer was onboarded very quickly and got to implement the requirements in a short amount of time."*

## PROJECT SUMMARY

TimsPark was hired by a telecommunications company to complete the development of an SDK for iOS. Their work included implementing missing features based on the provided requirements and specifications.

## PROJECT FEEDBACK

Tmspark onboarded an iOS developer onto the project quickly, allowing them to implement the requirements in a short period of time. The team offered efficient communication, timely deliveries, and a quick and straightforward process. They communicated via emails and messages.

## The Client

Please describe your company and position.

I am the CEO of a telecommunications company

Describe what your company does in a single sentence.

My company provides video streaming quality measurements to help providers monitor and optimize their solutions.

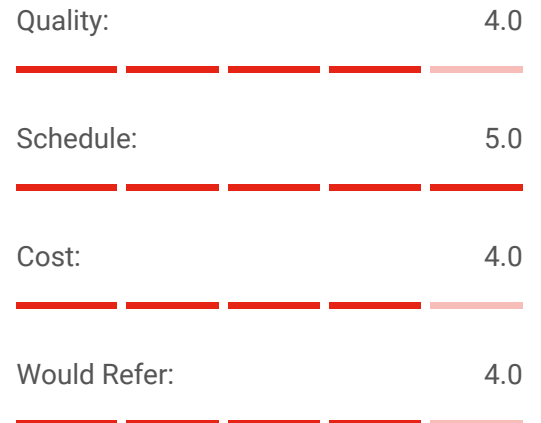

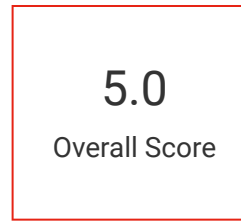

-  CEO, Telecommunications Company
-  Telecommunications
-  Austria

## The Challenge

What specific goals or objectives did you hire TimsparK to accomplish?

- Finalize development of an iOS SDK

### CLIENT RATING

## The Approach

How did you find Timspark?

Was approached by vendor after looking for personnel

Why did you select Timspark over others?

Quick turnaround for the specific project

How many teammates from Timspark were assigned to this project?

1 Employee

Describe the scope of work in detail. Please include a summary of key deliverables.

The work consisted of finalizing the development of an SDK for iOS. Based on the existing code base provided by us, the developer implemented the missing functionalities to reach feature completeness with respect to the given requirements specification.

Key deliverables included an analytics library to be integrated with AVPlayer, and a demo application to show to customers how the library should be integrated. An automatically generated documentation was created based on the code.

## The Outcome

What were the measurable outcomes from the project that demonstrate progress or success?

The iOS developer was onboarded very quickly and got to implement the requirements in a short amount of time. The communication was very efficient, and so the project was completed fast.

Describe their project management. Did they deliver items on time? How did they respond to your needs?

Due to the small scope of the project and the clear requirements, project management did not have to be involved at all, resulting in a quick and straightforward process. All items were delivered on time.

What was your primary form of communication with Timspark?

Email or Messaging App

What did you find most impressive or unique about this company?

The easy onboarding process and good focus on communication by the developer.

Are there any areas for improvement or something Timspark could have done differently?

With some of the deliverables, the code could have been tested more thoroughly by the developer, as some issues were discovered in review. However, due to the absence of a test suite and the short timeframe of the project, a full testability was not required.
